Keep rodents in check with PestConnect.

01

Proactive alerts. Rapid response. Problem solved.

Rodent activity does not wait for business hours. In large commercial facilities, infestations can go unnoticed until they disrupt operations, damage products, or put audits at risk.

PestConnect protects your business around the clock with a network of connected devices that detect rat and mouse activity early and trigger a rapid, professional response.

Fully integrated with our PestNetOnline portal, the system simplifies pest management for your business, making it easier to stay on top of reporting, trends, and compliance without added complexity.

PestConnect system.

02

MONITOR:
Continuous, 24/7
monitoring.

ALERT:
Real-time activity alerts to
your local office.

RESPOND:
Rapid response from an
expert technician.

REPORT:
Access PestNetOnline for
details and reports.

OPTIMIZE:
Intelligent data gathering
for improved pest targeting.

**PestConnect can
reduce rodenticide
use by up to 60%¹**

**PestConnect can
resolve rodent
activity twice as fast²**

¹ Based on the percentage decrease between the average rodenticide bait used at Rentokil Initial customer sites across the UK transitioning from pre or partially-connected (from 2017-2019) to fully connected pest control (in 2022). Results may vary.

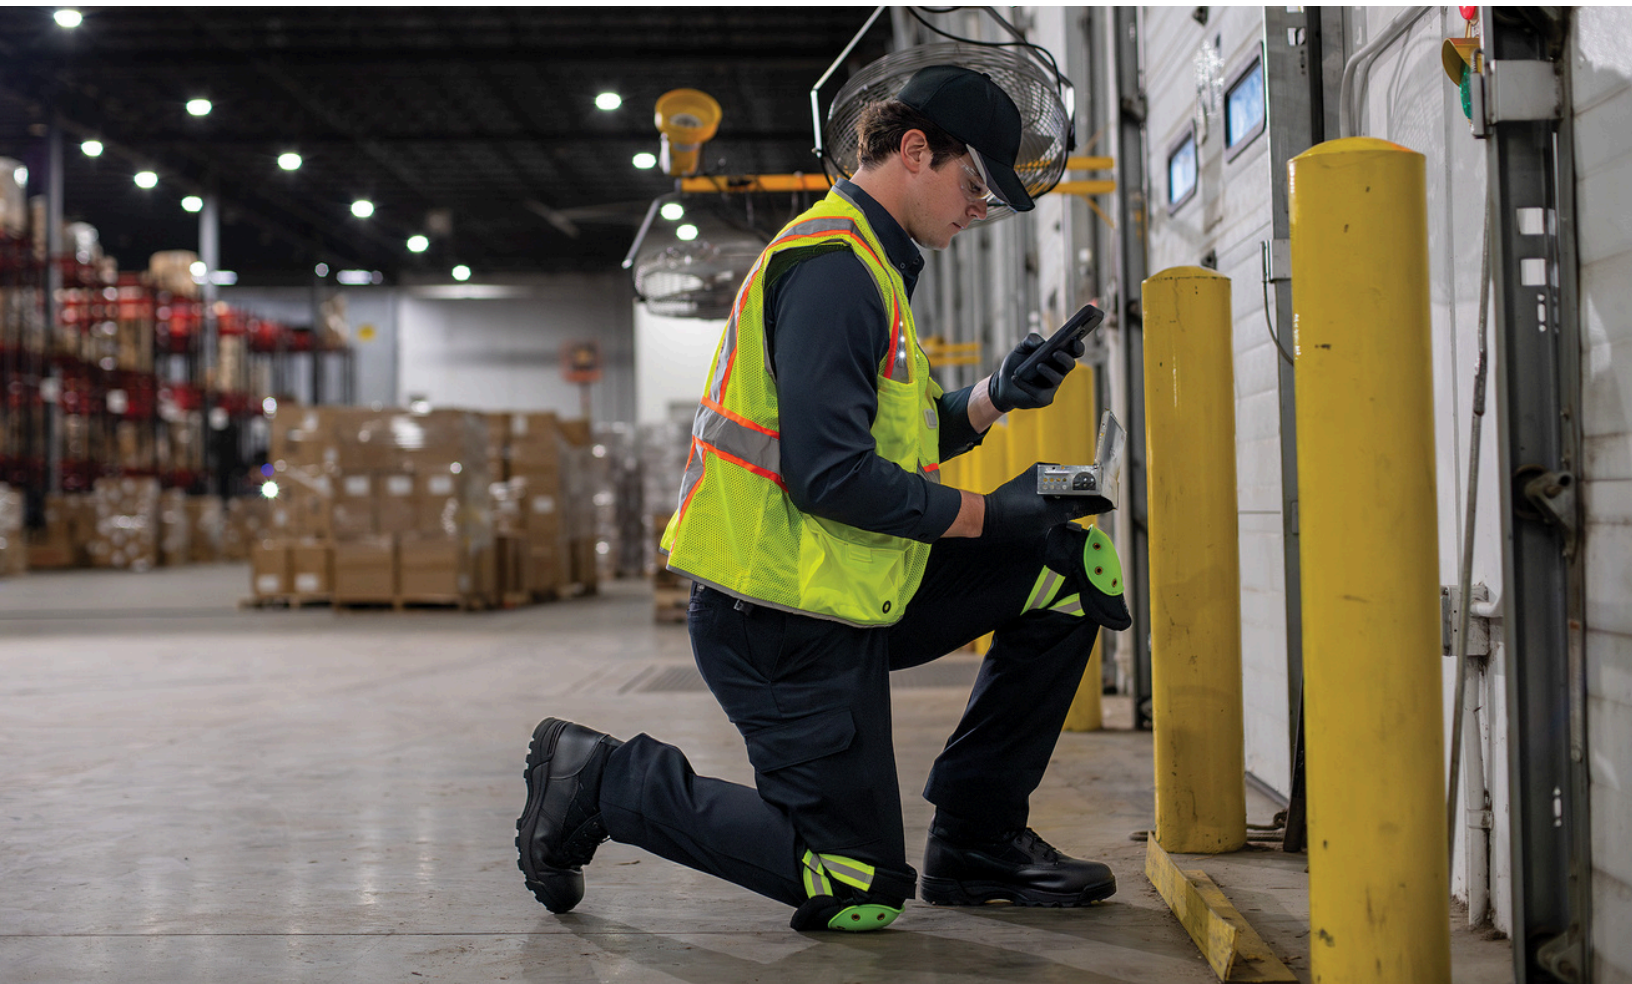

² Based on a comparison of the total average (in days) of rodent activity duration at Rentokil Initial customer sites across the UK transitioning from widely pre or partially-connected (2017-2019) to fully connected pest control (in 2022). Results may vary.

How PestConnect works for your business.

03

- ▶ We're notified the moment rodent activity occurs, ensuring faster response without any business interruption.
- ▶ Real-time data keeps you informed of risk areas and program performance.
- ▶ Wide-range, reliable connectivity works independently of your site WiFi.
- ▶ Strong security protocols help protect your data.

- Data stored in secure independent network
- Encrypted using HTTPS protocols
- Adheres to GAMP guidelines
- ISO 27001 certified
- Lora Alliance Member

PestNetOnline interactive dashboard.

04

PestConnect gathers the insights. **PestNetOnline** turns it into actionable reporting and program visibility.

PestNetOnline provides you with enhanced pest management service transparency.
From the interactive dashboard, you can:

Get an at-a-glance overview of pest conditions at your locations.

Close the loop on structural, sanitation, and equipment recommendations.

Access third-party audit documentation.

Produce charts and reports for internal use.

Trend your data to track the health of your facility.

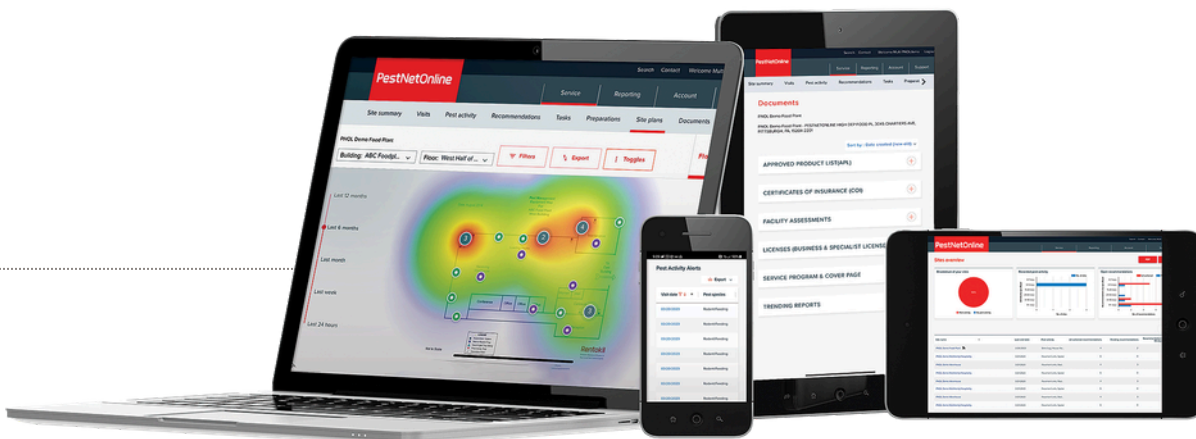

Get detailed proof of service reports.

Review materials used in your location.

Easily monitor location performance.

Why Bug Out?

Your operations and reputation are directly tied to the health of your employees and customers. As pioneers of connected pest management, our systems are backed with over a decade of data and refinement.
